Our fabrics

100% solution-dyed acrylic fabrics for awnings, marine and decoration.

Recacril® fabrics are designed for outdoor use, providing excellent UV protection and durability. As a result of our exclusive Infinity Process, they are water, dirt and mold repellent. They guarantee a high degree of resistance to the elements, superior comfort, and are easy to clean and maintain.

Strengths

The performance of Recacril® fabric is superior. We not only weave and finish the fabric, but we also enhance the technical properties right from the fiber, so that it offers the best performance on the market.

The Recacril® solution dyeing process

Fiber

Color pigments are applied to the polymer before the fiber is extruded. Therefore, the color is intrinsic; it is in the core of the fiber.

Yarn

During the warping and spinning process, the fiber is transformed into Recacril® yarn that is fully dyed. Therefore, the color does not just remain on the surface, but it is consistent right from the heart of the yarn.

Fabric

As a result, RECASENS' 100% solution-dyed acrylic fabrics have exceptional color retention, as well as excellent technical properties, and UV and weather resistance.
